PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience in Java/J2EE development and over 2 years of hands-on Python development. Expert in designing and developing scalable Microservices using Spring Boot, Hibernate, and RESTful APIs. Strong understanding of multithreading, concurrency, HTTP protocols, distributed systems, and secure application development. Experienced in full-stack development with React and modern frontend technologies. Proven experience delivering enterprise-grade applications in banking and regulated industry environments.

TECHNICAL SKILLS

Programming Languages: Java 8, J2EE, Python 3.x, JavaScript (ES6+)

Backend Frameworks: Spring, Spring Boot, Spring MVC, Hibernate, JPA

Python Frameworks: Django, Flask, FastAPI

Architecture: Microservices Architecture, REST API Design, SOAP Web Services, Multithreading, HTTP/HTTPS

Frontend: React.js, HTML5, CSS3, JavaScript, jQuery

Databases: Oracle, MySQL, PostgreSQL, MongoDB

Caching Technologies: Redis, Hazelcast

Tools & DevOps: Git, Jenkins, CI/CD Pipelines, Docker, Agile/Scrum, Basic AWS/Cloud Knowledge

PROFESSIONAL EXPERIENCE

Senior Software Engineer | ABC Technologies Pvt Ltd | 2021 – Present

- Designed and implemented scalable microservices using Spring Boot and Hibernate.
- Developed secure RESTful APIs and SOAP web services for banking domain applications.
- Implemented multithreading and concurrency mechanisms to improve performance and throughput.
- Integrated third-party REST APIs and external systems for seamless data exchange.
- Optimized SQL queries and improved database performance across Oracle and PostgreSQL systems.
- Implemented Redis caching, reducing API response time and improving system efficiency.
- Developed React-based user interfaces and ensured seamless backend integration.
- Participated in CI/CD pipeline setup, automated deployments, and production releases.
- Ensured compliance with security and regulatory standards in banking projects.

Software Engineer | XYZ Solutions | 2019 – 2021

- Developed enterprise-level Java/J2EE applications using Spring Framework.
- Built and consumed RESTful and SOAP APIs for business-critical services.
- Developed backend services using Django and Flask frameworks in Python.
- Integrated backend systems with React frontend applications.
- Worked extensively with MySQL and MongoDB databases.
- Maintained version control using Git and participated in Agile ceremonies.
- Collaborated with cross-functional teams to deliver high-quality software solutions.

KEY PROJECTS

Banking Transaction Processing System

- Developed microservices-based backend architecture using Spring Boot.
- Designed authentication and authorization modules for secure transactions.
- Implemented Redis caching to improve transaction processing performance by 30%.
- Developed React-based dashboard for monitoring financial transactions.

Python API Gateway Service

- Developed FastAPI-based service for routing and aggregating multiple backend services.
- Integrated third-party RESTful APIs and ensured high availability.
- Improved system scalability and reduced latency under high load conditions.

EDUCATION

Master of Science in Information Technology (MSc-IT) – Mumbai University

Bachelor of Computer Science in Information Technology (BCS-IT) – Mumbai University
