AG

SUMMARY

I am a fullstack-focused Software Engineer with over 5 years of experience in banking and regulated financial systems. My expertise lies in Java/J2EE, Spring Boot, and microservices architectures. I excel in API development, multithreading, and distributed systems. I have practical knowledge in Python backend development and frontend integration with React, achieving scalable and high-availability applications

EXPERIENCE

Senior Application Analyst

Kotak Mahindra Bank (Techplus Infotech Pvt. Ltd.)

📅 01/2022 📍 Mumbai, India

A leading banking institution in India focusing on financial services and technology

- Supported and optimized Java-based microservices handling UPI, Cards, Loans, and Account services
- Performed REST and SOAP API analysis using HTTP protocol knowledge
- Reduced incident resolution time by approximately 30% through structured root cause analysis
- Validated backend APIs, database transactions, and third-party integrations
- Analyzed distributed system logs (JSON) to identify performance and concurrency issues
- Collaborated with development teams to improve API reliability and system stability
- Ensured compliance with banking security and regulatory standards

Technical Support Engineer

Concentrix

📅 01/2021 - 12/2022 📍 Mumbai, India

A global customer experience services company

- Provided enterprise-level system troubleshooting across Windows, Linux, and macOS environments
- Strengthened debugging, networking, and system-level problem-solving skills

EDUCATION

MSc IT

Mumbai University

📅 09/2019 - 06/2021 📍 Mumbai, India

BSc IT

Nirmala Memorial Foundation College

📅 09/2016 - 06/2019 📍 Mumbai, India

SKILLS

Java Java EE SpringBoot

REST Microservices

Multi-threading Python React

JavaScript TypeScript

Java Spring Soap JWT Flask

Django HTML jQuery Redux

PostgreSQL MongoDB Caching

Redis Git Jenkins Docker

Linux AWS EC2 S3

SOAP API JSON Mac OS

Node.js

PROJECTS

Banking API & Microservices Platform

📅 01/2022

Development of microservices for banking applications to handle financial transactions efficiently

- Worked on Java-based microservices supporting real-time financial transactions
- Validated REST and SOAP APIs and ensured transactional consistency
- Assisted in performance optimization using Redis caching strategies

Full Stack Application Development

📅 01/2022

Full stack application development involving UI and backend service integration

- Developed React UI integrated with backend services
- Implemented backend APIs using Node.js and basic Spring Boot concepts
