PROFESSIONAL SUMMARY

Automation-focused IT professional with experience supporting large-scale banking platforms and driving operational efficiency through SQL analysis, Python scripting, and proactive monitoring. Skilled in troubleshooting distributed systems, performing root cause analysis, building automation utilities, and validating production data flows.

PROFESSIONAL EXPERIENCE

Senior Application Analyst | Kotak Mahindra Bank | Jan 2022 – Present

- Provided L2 production support for Kotak 811 digital banking platform
- Performed SQL analysis to investigate transaction discrepancies and API failures
- Executed Root Cause Analysis using logs, monitoring dashboards, and DB insights
- Developed Python automation utilities for log parsing and workflow optimization
- Validated backend integrations and API responses using Postman
- Collaborated with DevOps teams during release validation cycles

PYTHON AUTOMATION PROJECTS

- Log Monitoring Automation using Python for error detection and alerting
- SQL Data Validation automation using Python and Pandas
- API Health monitoring automation using Python requests
- Automated reporting pipeline using Python and SQL

TECHNICAL SKILLS

Python, SQL, PostgreSQL, MongoDB, Grafana, AppDynamics, PagerDuty, REST APIs, Postman, Docker, AWS, Linux

EDUCATION

MSc IT – Mumbai University
BSc IT – Mumbai University
